Bristol’s Good Food Action Plan 2015–18: Detailed plans

Information for this detailed plan was collected during March–June 2015. Most of the information was written by the people/organisations adding their plans to the Good Food Plan for Bristol. These contributors were issued with a blank template form that included two sample ‘model’ entries. Some information was obtained by interview and has subsequently been checked by the interviewees. Some information was obtained through themed meetings on Food Waste/Wasted Food and Land and Planning.

Most entries relating to Bristol City Council’s work were updated by Bristol City Council in December 2015, other entries were updated in January or February 2016. This is noted on the individual entries concerned.

Contributors who filled in the form were issued with the following instructions:
Good Food Action Plan for Bristol

Introduction
Bristol Food Policy Council are currently developing an action plan to champion progress towards Bristol becoming a healthier, fairer and more sustainable food city by 2020. We are aiming to have developed an action plan by the end of July as part of our application for a Silver Sustainable Food Cities Award. As part of this process we want to contact as many food related projects and businesses as possible to find out what they are doing in Bristol and how they are contributing to the aims and outcomes of the Food Policy Council. In addition we see this as an opportunity to link together all the food related activities going on in the city and create a united front for Bristol’s sustainable food movement. While the Food Communications Subgroup of the Food Policy Council is steering this work, we want it to be owned by the City. We therefore hope that the Action Plan will evolve as we contact different businesses and projects who may highlight gaps, and reshape the outcomes so that this remains a dynamic process in the years leading to 2020.

The Bristol Food Policy Council aims for 2020
Bristol Food Policy Council have grouped their outcomes under the following 10 aims:

1. ACCESS & AFFORDABILITY
   Aim – Increase access to affordable good food

2. HEALTH, EDUCATION & ENGAGEMENT
   Aim – Promote healthy, affordable & sustainable food to the public. Provide learning opportunities for growing & cooking.

3. ECONOMY I
   Aim – To champion the use of local, independent food shops & traders to help keep our high streets vibrant & diverse

4. ECONOMY II
   Aim – To promote community-led food trade such as co-operatives, buying groups, Community Supported Agriculture & pop-up shops

5. ECONOMY III
   Aim – To retain & strengthen city links with local wholesale markets, & nearby abattoirs, dairies & farms

6. ECONOMY IV
   Aim – To help open-up markets for food made or grown by local, regional & Fairtrade producers

7. CATERING & PROCUREMENT
   Aim – Transform catering & procurement

8. LAND & PLANNING
   Aim – To promote the use of good quality land in & around Bristol for food production in balance with the natural environment

9. URBAN AGRICULTURE
   Aim – To increase the amount of Bristol-grown fruit & vegetables supplied to restaurants, cafes, markets & households across the city

10. WASTED FOOD & FOOD WASTE
    Aim – To minimise food waste by encouraging composting & the redistribution of good food that would otherwise be wasted

Each of these aims has their own table in the action plan below.
What's in it for you?

"What’s in it for you” depends on what you do. The action plan is in essence a planning and monitoring tool which we hope will highlight the depth and breadth of food activity in our city. We also hope that this will help projects to see that they are a part of a larger movement in Bristol toward a more sustainable food system and will find encouragement and support in this. We only want to include actions that are achievable, and there isn't any compulsion or penalty for not delivering. One of the benefits of the action plan is that it will enable us to see where gaps, barriers and key issues are. We hope that as a city we will be able to see what needs to be done and find solutions through small collaborations and shared learning from each other. It may also help organisations seeking funding and support for their projects. Their work can be seen as part of a whole-food-system approach in Bristol in which there are many people and organisations working towards shared goals. There may be opportunities to pool resources and share experiences, meaning funding goes further.

Instructions for adding you project to the action plan

In the tables below we have grouped the Food Policy Council’s outcomes for the next 3 years under 10 aims. There is a table for each aim. The table should take around 30 minutes to an hour. The tables contain entries from 3 other projects in red text as examples of the kind of information we are trying to gather.

1. Decide on which of the above aims is most relevant to your project/business. Please decide on one aim only. We recognise that the majority of projects will touch upon several aims, however, we are trying to make this table as concise as possible. If your project/business touches on other aims, refer to this is the column titled 'Project Outline'.
2. For each appropriate aim write a brief description of you project/business in the column titled 'Project Outline' and insert you details in the next three columns.
3. The following columns list the Food Policy Council outcomes which are related to a particular aim. Mark which of these outcomes your project/business will help to meet.
4. If you feel there are outcomes related to an aim that your project/business will help meet that have not been included, please add them in the last few columns found on each table.
5. Once you have added all the relevant information about your project/business please email the table to Jane Stevenson at janestevenson@madasafish.com.

Please note that this action plan will be available to the public so only add details about your project that you are happy to be shared in this way. If you have any queries whilst filling out the table please contact Beth on the above email.

Thank you very much on behalf of the Food Policy Council for taking the time to provide us with this information!
1. ACCESS & AFFORDABILITY
Aim – Increase access to affordable good food

**Does your project address any of the Bristol Food Policy Council 2020 outcomes? (add more details if appropriate)**

**The Matthew Tree Project**

The Matthew Tree Project works in two ways:

a) In a holistic way, we empower disadvantaged people to live dignified, fulfilling and self-sufficient lives.

b) We engage with policy makers, local and national, to effect systemic change to create a more equal and fair society for all.

In 2014 The Matthew Tree Project supported, through a network of Food Plus Centres, over 2,100 of the most disadvantaged and vulnerable members of society, 42% of which were children.

2016: Pilot local Saturday ‘Good Food Market’, Filwood

8 week trial Spring/Summer 2016 every Saturday 10am-2pm. Alongside the market there will be activities for children, a seated cafe area, food demonstrations, as well as talks and films. The long term goal for the market will be to develop a Good Food Supermarket that is open all year round and operates on 3-tiered pricing system in order for the underprivileged in the area to be able to afford good quality food too.

There has been considerable business planning for the Good Food Market via an (unsuccessful) entry within the Majors Challenge Bloomberg Philanthropies competition in which it reached the final shortlist. The plan retains the backing of BBC, Bloomberg Philanthropies (New York), EDD (Education Delivery Unit, USA) and the Innovation Unit.

See also FOODTURES project under Aim 9.

**UPDATED DECEMBER 2015**

Elm Tree Farm plans to open up an on-site farm shop to sell our produce to the public.

Elm Tree Farm Park Road

We don’t currently have funding for this project.

We More local people will have access to fresh seasonal food.

The people we support will gain experience in retail.

Local people will have access to fresh produce on their doorstep. [ww.BoNEE.org](http://www.BoNEE.org) patricia.lucas@bristol.ac.uk jo.williams@bristol.gov.uk

**Funding information if appropriate (e.g. Green Capital project)**

For example, through healthy weaning groups as Wellspring Healthy Living Centre, and through analysing existing data to report on the nature of healthy living provisions for families with young children in the UK.

Significantly more ‘good’ food is being produced on city land meaning more money is being retained within the city. This increases the wealth of the city in two ways: a growing producer on local land and processing value added products in local kitchens, and (b) by selling the products produced locally meaning more money is being retained within the city.

A fairer and more equitable society improves the quality of life for all by way of less social and health problems. It reduces crime, judicial interventions and social unrest and therefore reduces the demand on public services by way of improved living standards, improved self esteem, better health and therefore less need for NHS services.

**Bloomberg Philanthropies (New York), EDI (Education Delivery Unit, USA)**

planning to open up an on

Indicators

| Ongoing commitment to making good food accessible within Stokes Croft. | Green Capital small grant |
| Warehouse space, and parking for people wanting to do a weekly shop. | Green Capital small grant £8,700 |
| If The Canteen moved on, we've looked at how you might put a wholefood store / co-op in Hamilton House – there's two floors of parking below that could act as warehouse space, and parking for people wanting to do a weekly shop. Ongoing commitment to making good food accessible within Stokes Croft. | 

**Knightstone Housing Association**

Developing food-related projects in response to resident demand. Ongoing projects are:

- Community allotment in St Pauls
- St Agnes Park: food growing in raised beds
- 23 growing group, starting a food hub and planning to organise a food market
- Inns Court in Knowle West starting a food hub (working alongside the Matthew Tree Project)
- HIEAG, building a roundhouse in the community allotments

Residents at the Inns Court Community in Knowle West are trying to set up a weekly food market taking place on Saturdays outside the community centre.

Becca Mills, Community Empowerment Officer
rebecca.mills@knightstone.co.uk
www.knightstone.co.uk

**Bristol Hospitality Network**

The Asylum Seeker Allotment Project started in 2009 and helps link together the Bristol Hospitality Network of hosts, asylum seekers, refugees, volunteers and other supporters by providing a communal space to grow food organically. The project helps to share skills between cultures and empower people with a sense of practical achievement.

It's response to resident demand. Ongoing commitment to making good food accessible within Stokes Croft.

**Bristol 2015** is helping to fund The Buzz Community Food Shop, transforming an empty building in Lockleaze into a community shop and enterprise hub selling fresh, quality, affordable foods, as well as a coffee shop and smoothie bar. Also delivers against Aim 4.

**Hamilton House Food Service.** When Hamilton House was being opened by Comunit, The Canteen was planned as a separate entity. Martin Connolly, owner of Hamilton House, was very supportive, and the ONLY condition imposed was that the food should be 'fresh, inexpensive, and local'.

If The Canteen moved on, we've looked at how you might put a wholefood store / co-op in Hamilton House – there's two floors of parking below that could act as warehouse space, and parking for people wanting to do a weekly shop. Ongoing commitment to making good food accessible within Stokes Croft.

**Indicators from Baseline report, mapped to 2020 outcomes**

| 45 organisations such as schools, nurseries that have received a school garden award | 4.3% of reception age children in Bristol are obese |
| 93 schools, nurseries etc have been involved in Bristol in Bloom Projects since 2005 | 19.3% of year 6 age children in Bristol are obese |
| 9.3% of reception age children in Bristol are obese | 9.0% of reception age children in Bristol are obese |
| 19.3% of year 6 age children in Bristol are obese | 0.9% of reception age children in Bristol are underweight |
| 1.04% of year 6 age children in Bristol are underweight | 60.4% percent of respondents from the Quality of Life in Bristol Survey who cook at home using fresh and raw ingredients |
| 86% percent of respondents from the Quality of Life in Bristol Survey who eat home cooked meals 4 times per week | 16% of Bristol’s population suffer from income deprivation |
| 25.65% of Bristol’s children live in poverty |
| There are 19,510 children living in households receiving out of work benefits In 2011/2012 there were at least 7,600 and figures collected in the first quarter of 2013/2014 indicate that as many as 13,000 people could be supported in the Bristol area In 2011/2012 this number rose to at least 7,600 and figures collected in the first quarter of 2013/2014 indicate that as many as 13,000 people could be supported in the Bristol area |

In 2011/2012 this number rose to at least 7,600 and figures collected in the first quarter of 2013/2014 indicate that as many as 13,000 people could be supported in the Bristol area.

Community Kitchen & Allotment - Plot to Plate. NWHA's bespoke teaching kitchen is in the heart of Knowle West and works in partnership with NWHA's beautiful and bountiful community allotment just around the corner. Side by side the two facilities and their staff deliver Plot to Plate sessions for the local community, sharing knowledge about growing and cooking good food as well as selling fresh local vegetables and eggs. The aim of the organisation is to protect, preserve and promote good health and wellbeing through these facilities, workshops and courses for local people.

| Knowle West Health & Social Care | Funded for specific activities. | People in South Bristol will have access to cookery and gardening training with a focus on using healthy affordable and sustainable food. This will increase skills and choices. This is measured by our evaluation and monitoring system. | Yes – increase in users accessing the allotment facility | Yes – we will increase the quantity of food growing and cookery courses for local residents | Yes – all courses are based on this overarching learning objective | Yes – we teach people to cook meals from scratch | Yes – we encourage people to use produce from the allotment (local). We have an environmental policy that states we should "seek to purchase fair-traded and environmentally sound goods" and "if possible, food should be organic, fruit and vegetable should be in season...". This ethos is integrated into our scheme of work for all sessions. |

| Cabot Institute Food Security Group | A research group at the University of Bristol. The main focus is global production, but we include members who are interested in understanding the relationships between planetary and human health. | www.bristol.ac.uk/cabi
ont/food/research/html | n/a | New collaborations to study sustainable farming practices, including the relationships with food consumption. Research findings suggesting innovative sustainable models of farming | no | no | no | no | yes | Increased sustainability of farming systems. Increased food security. |

The Urban Growing Trail brings urban growing right into the heart of the city by creating an edible trail of demonstration gardens between Temple Meads and the FOOD exhibition at @Bristol. The gardens illustrate a range of ways of growing, from high-tech hydroponics to low-tech guerrilla gardening.

At end of May 2015: 5 beds installed from Temple Meads, 5 beds at Millennium Square, small pop-up orchard to arrive soon at St Mary Redcliffe. Grow Bristol's Grow Box is in a floating element along the Trail route. Housed at Engine Shed at end of May, moving to @Bristol. IE are looking for site for tree hire.

Events arranged to bring people into the Trail for learning and to encourage people to harvest food. IE will invite growing groups and the health/food sector to get involved. It is hoped that people will take inspiration from the Trail back to their homes/part of the city, and that it will demonstrate that growing food doesn't need much space.

Trail is likely to be maintained by community work days, bringing in locals as well as IE volunteers. Sociable gardening, allowing people to share and pass on their expertise/experience.

The Trail could be the start of an “Edible Gateway” to Bristol as part of the Redcliffe redevelopment.

Severn Beach Line edible beds

Severnside Community Rail Partnership have funded containers and plants, werri beds & recycling bins along the Severn Beach line. Schools closest to each station along the Severn Beach line have been involved in a local art project and installation of edible beds at the stations, and will help with maintenance. 4 community payback workers will also maintain beds. Noticeboards included will give information on what’s in the beds and with suggested recipes. Mostly perennials and fruit.

The plan is to extend the scheme along other local lines at local stations towards Bath & Weston super Mare.

| Incredible Edible Bristol | EDF 2007 Seven Capital Strategic Grant | Trail continues beyond 2015 and is added to by businesses on the route. Other environmental benefits: e.g. pollinator bed at Cheltenham House | Severnside Community Rail Partnership. | | | | | | | |

Edible Schools Launched May 2015

A teachers and outdoors learning meeting looked at resources currently available for schools and in response, put together a basic week-by-week online course, to support a September-July growing programme. This offers back-to-basics support for primary school teachers who don’t get training in growing, to take fear out of the activity for them. Very light-touch scheme – sign-up required but no obligations. Blog & forum.

At end of May 2015: around 5 schools using the site on a weekly basis.

Schools competition

Prize: £500 from Almondbury Garden Centre plus support from Sara Venn for a year.

Won by 3 diverse gardens:
– Bristol Hospital Education School, with allotment at Ashley Down
– Southville Primary, mid-sized completely new garden
– Dolphin, virtually no land

Plus also supporting Shirehampton school which has taken on a large patch of land, and could become a good model of school-community engagement.

The 4 gardens will provide good case studies for different types of school garden.
The Incredible Edible Network are going to use this as the national schools programme. Could result in model policies/advice on e.g. community access to school land.

### One Tree per Child
To plant one tree for every primary school aged child. (Reception year through to year 6), in the city which, census tells us, is around 36,000 kids. We're doing this in a few ways:

- 14,000 apple / pear trees given to school children after an educational assembly
- 2015 specimen trees in schools and parks.
- 75 whitebeam trees planted in school
- 22,000 trees planted as hedgerows or in new woodlands (may include edible hedgerows)

The Avon Woodland Trust is currently assessing 122 woodland sites for planting. We’ll be selecting the most appropriate out of these to create new woodland with help with planting from school children, volunteers from the community and corporate volunteer groups. Avon Wildlife Trust implementing project.

Most planting in Autumn 2015, going over to Spring 2016

### What Happens Next
We are using our concept – from Seed to Celebration - to create engagement and excitement between young people and food. It starts by planting a seed; as the plant grows, students nurture it and make healthy meals from the crop; they will share this learning experience by celebrating the process with others. Finally, any unused plant cuttings and food waste is turned into compost and fed back to the plants, starting the life cycle once again. This method means we are always asking the important question, ‘what happens next?’.

So far we have run educational programmes and we have written an educational growing and cooking resource which we sent to all 106 primary schools in Bristol along with five seeds [aka, Seed in Celebration Giveaway]. The next part of our journey remains focused on schools in Bristol. We aim to aid schools in their teaching of young people by sourcing and creating educational learning resources, as well as growing and cooking equipment.

We have also begun assessing the environmental and ecological factors surrounding every school in Bristol, and selected them into areas with known wildlife networks. To support Bristol’s biodiversity, we have selected edible plants that will help enrich nature within these areas. These plants can be grown, made into food and celebrated. It is part of our strategy to develop our understanding of each local ecological factors and then encourage schools to grow supportive plants to help connect schools with their surrounding environments.

The central premise of all of our work is to create a more conscious understanding of natural life cycles and the environment. See also Aim 10

### Bristol City Council
Provision of training to Bristol Schools to enable good management of increasing food activities and keeping food safe

**UPDATED DECEMBER 2015**

RCG – Public Health

Grace.davies@bristol.g ov.uk and

Rachel.cooke@bristol.g ov.uk

80+ trained 2014/15

### Bristol City Council
Environmental Health

Food safety inspections/visits of food businesses

Inspect food businesses in line with statutory duty aspireing to increase number of businesses inspected from 2015 onwards ensuring standards are met by more businesses and the visits provide an opportunity to promote healthy food offers whilst continuing to prioritise high risk businesses.

**UPDATED DECEMBER 2015**

Food Safety Team, E:Adrian.jenkins@bristol.gov.uk

Statutory function of RCG

Inspections of food businesses to quality control systems and practices to reduce risks of food poisoning, talk about staff training, control hazard/ temperature control, request documentation including recipes, control records and food safety management systems. Samples and swabs may also be taken.

### Bristol City Council
Engaging Bristol based organisations and businesses in the Workplace Wellbeing Charter, which includes improvements in the food offered to staff and supports healthier and more sustainable approaches.

**UPDATED DECEMBER 2015**

Liz McDougall, Public Health, RCG

E: liz.mcdougall@bristol.gov.uk

30 organisations currently engaged
Also delivers against aims 1 & 7.

Several homes have set up cooking clubs. We work closely with Francine Russell of All About Food developing on course into a recognised qualification, as an NVQ that all staff will continue to provide formal 10 week training courses for staff with Milestones Trust.

Milestones Trust is improving access to affordable, healthy and sustainable food in residential homes and other sheltered accommodation. We have been training services users and staff in growing food and sourcing sustainable food. We have provided and continue to provide formal 10 week training courses for staff with the Square Food Foundation, which focuses on the preparation of nourishing meals that are good for people’s bodies and minds, and improving understanding of what good food is. The course and other on-site learning also cover catering for special dietary requirements. The Square Food Foundation is developing the course into a recognised qualification, as an NVQ that all UK care staff can achieve. We aim for this project to improve standards of food in care across Bristol and the UK.

We work closely with Francine Russell of All About Food developing on-site learning for staff and residents, encouraging home growing and cooking from scratch. Residents participate in menu planning and in the preparation of meals. Several homes have set up cooking clubs.

Several of our residential service run projects with Growing Support, who work with service users to grow vegetables and cultivate seasonal produce to use in meals. We are hoping to expand and develop this work further across the Trust from 2015-2018. Working with volunteers and our service users, this will create a more inclusive environment around food growing and widen the health and social benefits it can offer.

We are developing a top level standard for food and food procurement in residential homes. In 2015 introduced a Food Policy requiring residential services to begin a shift to suppliers who are local and provide food that meets Soil Association accreditation criteria.

The Soil Association’s Fund for Life ‘Better Care Conference’ and ‘Care Settings Pilot Seminar’, 16 June 2015, Royal Horticultural Halls London. Louise Chambers will present Milestones Trust’s work so far. Also delivers against aims 1 & 7.
Hannah Pitt on the Food For Life Partnership and Milestones Trust will be published in June 2015, measuring outcomes of our work so far. Growing body of evidence of benefits of ecotherapy, achieved through our work with Growing Support. This is a cost-effective natural supplement to existing treatment options for some mental health options, helping people who don’t usually do much exercise be active, boosting skills and confidence to get back into work or training and combating social isolation.

This work increases and improves opportunities for service user input into their meal plans and activities. By 2020 75% of menus in our homes will be freshly prepared.

On 18 June 2015 Louise Chambers will present our work at The Soil Association’s Food for Life Care Settings Conference. Presentations at food and assorted health and social care events in and out of Bristol will push nourishing food in care up the health agenda.

By 2018 Milestones Trust will publish a study measuring real health outcomes of the Food Policy, such as reduced use of medication such as laxatives, and reduced admissions to hospital as examples of KPIs. We will compare the results of this research to those collected in 2013 at the beginning of this project, to measure real outcomes.

The Big Picnic
Food for Life Partnership, as part of the Green Capital work, are working with schools in all 14 Neighbourhood Partnership areas. The picnics are planned to happen at the end of GREEN WEEK, with the majority happening on 18/19 June. Each of the 15 BIG PICNICS is hosted by a school (who take ownership of the picnic) and up to 4 participating schools will walk (hopefully) to the picnic.

Participating schools:

• 30 children from each school (plus accompanying adults) will attend each picnic.
• Each attendee will bring a food plant they have grown. These plants will be swapped for plants from other schools.
• Each school will share something they have been working on around the theme of sustainable food.

We are also organising

• cookery demonstrations and tastings around the theme of sustainable food (funded by the NP or by school funds).

Glyn Owen, Food for Life, Soil Association Glyn Owen@soilassociation.org

Green Capital Neighbourhood Partnership funding £13,620.00

The plants brought back to the school from the plant swap will be grown on in schools.

Schools will be inspired to grow more and explore more issues around sustainable food.

Measuring: Against baseline data on the 14 targeted schools in the Bristol Healthy Schools commission.

Number of schools enrolling in Food for Life programmes.

| Yes | Yes | Yes | Yes | Yes | Yes | Yes | Yes |
- gardening workshops (provided free by local groups or the schools themselves)
- Composting workshops (provided by Food For Life)
- Sports workshops (provided by Bristol Rugby, Bristol City Community Trust, Fit4Fots or the schools themselves)

A nursery age picnic is being organised by Jo Ingleby and Windmill Hill City Farm.
The Bishopston, Cotham and Redland Picnic will happen as a lead into the LIVE LINK celebration on Thursday 18 June at Millennium square (organised by BIG GREEN WEEK).

This is Rubbish: The Milking Parlour
Art installation project, with Jessie Reid living with a cow for a week (probably in Ashton Court stables), Highlighting issues around milk costs/production and looking at the “valuing food.” Delivery 2016.

The Food Connections festival brings communities together, reaching people of all ages and backgrounds, to spark transformative conversations about where our food comes from. We believe that putting good food at the heart of local communities makes them healthier, happier and more connected. Our aim is to offer inspiring educational experiences in a fun, food festival format, making learning accessible to all. We offer more than just the opportunity to watch others cook, create experiences, inspiration and learning that aim to transform the way we think about food.

The 2015 festival saw more than 130 events take place across the city over 1-9 May, with more than 115,000 people participating, with a programme organised into 6 themes:
- Families
- Feasting & festivities
- Wellbeing
- Get Cooking
- Land and Growing
- Brainfood

The Food Connections Festival is the only Bristol event to work with a broad range of key strategic organisations across the city – These include the BBC, Bristol City Council, Bristol University, University of West of England, Visit Bristol, Business West and others.

Food Connections is working to develop a truly international reputation, as the leading good food event in the UK. We are starting to see evidence of this, as seen in our listing with Gollanera as one of the ‘Top 10 European Food Festivals.’ Long-term partnership agreements are in place with the BBC and Bristol City Council for the festival to return in 2016. The BBC are committed to keep the Food and Farming awards in Bristol for the next 3 years (this has formed the launch event for Food Connections in 2014 &15).

Over the coming years Food Connections aims to grow, with plans underway to expand our inclusion of eateries and food-businesses from across the South West bring international speakers & food revolutionaries into the city whilst aiming to develop connectivity and food education within the many communities in the city and continue to build Bristol’s reputation as the UK centre of all things good food related.

Funding package in place with Bristol City Council for 2016–2018. BBC commitment to keeping Food & Farming Awards ceremony in Bristol for 3 years.

**91 Ways**

Named after the estimated number of languages and dialects spoken in Bristol, this project comprises of a series of events kicking off in June to engage Bristolians of all backgrounds in leading more sustainable lives. The aim is to bring people together to share stories, food, experience and ideas using the power of food to encourage dialogue and action.

**Good Food Tour** will be running fun pop-up cookery activities with local partners in all 14 of the neighbourhood partnerships in Bristol. The tour will run at pre-existing community events around the city and at established food venues and major city events. The project seeks to find partners who want to host and join in events. The Good Food Tour will be demonstrating attractive, simple, affordable, low carbon, healthy and nutritious food using basic equipment and seasonal ingredients from local suppliers. At all the events there will be take away packs with the recipes displayed; how to cook low-carbon food and where ingredients can be sourced from, e.g. where to get veg boxes etc.

There will also be a series of ticketed, chef-led events to promote low carbon cookery aimed at audiences more used to eating out at restaurants. At these tasty good food we will be promoted with recipes and a commentary on cooking with unusual ingredients and sources of vegetable protein.

**Flexitarian Bristol** is a group of conscientious consumers, producers and healthy food advocates promoting less and better meat and dairy to nourish local

There will be more local chefs confident to offer simple, affordable vegetable-based meals on their menus.
farming, livestock, people and planet. Reducing overall meat and dairy demand and encouraging a shift to well managed, high welfare farming will significantly improve our planetary health, and increasing enjoyment of fruit and vegetables offers one of our biggest public health opportunities. Flexitarian Bristol are bringing people and projects to form a dynamic local movement including citizens, food businesses and our city council. We are campaigning for Bristol to take the lead on evidence-based dietary change and become the first UK city to promote a ‘flexitarian’ diet and an inspiration to others.

Also delivers against Aim 7.

KOP

KOP will promote and increase access to healthy, nutritious food for all, and improve health and wellbeing. This project is part of a wider vision to support cooking courses coordinated by the Portland Centre for Integrative Medicine (PCIM) and the Portland Centre of Excellence in Integrative Medicine (PCEM). The Portland Centre are also working in collaboration with Bristol’s community of cooking professionals who will refer patients they feel will benefit to the service. The PCIM team are also working in collaboration with Bristol’s community of cooking professionals to facilitate the delivery and evaluation of a) feasibility study with 30 people delivering 15 week family-based cooking course for families of overweight/obese children which aims to empower parents to trust themselves by changing their diets and eating behaviour; b) cooking courses in conjunction with Public Health Bristol for people with other Long Term Conditions. KOP will be linked with other food projects eg food route, giving people in a lesson surplus

Hello@flexibristol.org

Flexible providers, team are also working in collaboration with Bristol’s community of cooking professionals will refer patients they feel will benefit to the service. The PCIM team are also working in collaboration with Bristol’s community of cooking professionals who will refer patients they feel will benefit to the service.

The PCIM method, measured by greater press and social media coverage. More meat-free options in restaurants and across public procurement, measured by increased establishments meeting our flexi restaurant criteria and council advocacy and partnerships. Meat and dairy reduction an integral part of sustainable food initiatives/criteria.

Visit us on Facebook @KOPflexi

North Bristol NHS Trust

is already committed to monitoring and sourcing local organic, seasonal and fairly traded food in line with our Environmental Policy. In addition, we aspire to adopt a new Food Policy to further demonstrate this commitment which will explore the learning & growing opportunities here at the Trust to promote healthy eating to benefit health & wellbeing for all.

We will host a regular pop up fruit and veg market stall provided by a local community led grocer at our main site at Southmead Hospital. The fruit and veg stall will promote organic, seasonal, locally grown and fairly traded food in line with our recently adopted Environmental Policy which commits us to engage our staff, patients, visitors and the wider local community on sustainability and links to health & well-being.

We have achieved the Silver Soil Association Food for Life Award for patient meals sourcing our fresh, seasonal and organic ingredients from local suppliers. We hope to extend this to achieve the Gold Award for our patient meals and also begin working towards Food for Life within our staff restaurant.

North Bristol NHS Trust has already achieved the Silver Fairtrade Award for promoting Fairtrade products within our staff restaurant and coffee shop. We hope to improve on this to achieve the Gold Award.

(also help deliver against aims 6 & 7)

Trinity Community Arts

As a Key Arts Provider for Bristol City Council, Trinity Community Arts’ mission is to give people the opportunity to access and shape arts and culture in the city. Projects are developed in response to the needs of local communities at Trinity Centre and Arts West Side (Old Market), and include a community garden project and activities such as creative writing workshops, play-days and healthy eating sessions.

The Grow it! Cook it! Eat it! project, part of Bristol 2015, aims to engage local residents of Eavon, Ashley and Lawrence Hill in sustainable food, growing and cooking from scratch, and informing people of other green ideas. We are doing this through monthly community growing days, family lunch clubs, foraging walks, green talks as well as other projects and events.

Trinity Community Arts Ltd

www.tca.org.uk Email: helenw@tca.org.uk T: 01179351200

£60,000 Bristol 2015 Green Capital Funding and Creative Youth Employment (match funding)

People’s attitude towards food production, waste reduction and sustainability will be improved, and this will be demonstrated in the way they cook, eat and live.

Attract more people to know about and use our already successful community garden.

Teach people cooking skills, and how to reduce waste. Teaching foraging skills, so people can source free healthy food and learn the medicinal benefits of plants.

Yes, in how and where to source your food, as well as how to cook it

Yes, we try to use as much as possible grown in the garden, sourcing other ingredients from foodshare and local shops, to help reduce waste food.

Changing attitudes towards healthy food will have a positive environmental impact. If we receive more funding we would like to continue this project indefinitely but we are also looking at ways of making it sustainable in the long run.

Kitchen on Prescription

Kitchen on Prescription, coordinated by the Portland Centre for Integrative Medicine (PCIM) aims to make the delivery of motivational healthy eating cooking courses – delivered out of Community Training Kitchens or elsewhere – part of mainstream healthcare. This project is part of a wider vision to support activities that could be prescribed as part of a social prescribing model to improve health and wellbeing. KOP will promote and increase access to healthy, affordable, sustainable food to the public and reduce food waste; and improve culinary skills and provide motivation to change behaviour. Ideally, healthcare professionals will refer patients they feel will benefit to the service. The PCIM team are also working in collaboration with Bristol’s community of cooking education providers to facilitate the delivery and evaluation of a) a feasibility study with 30 people delivering a 10 week family-based cooking course for families of overweight/obese children which aims to empower parents to trust themselves by changing their diets and eating behaviour; b) cooking courses in conjunction with Public Health Bristol for people with other Long Term Conditions. KOP will be linked with other food projects eg food route, giving people in a lesson surplus

healthcare

£50,000 Green Capital Strategic grant

Many more motivational healthy eating courses will be available at a discounted rate or for free for people who want to improve their health by improving the quality of food they eat. Education professionals will be able to refer people with a Long Term Condition to a KOP motivational healthy eating cooking course – with health

Yes

Yes

Yes

The government – via council or NHS – part-funds the provision of cooking skills training for people with (or at risk of developing) a Long Term Condition.
### Bristol Community FM

Bristol Community FM is making a series of 12 hour-long radio programmes about food. Each programme will be broadcast in a different language, accompanied by an English translation. The shows will be in Polish, Somali, Sudanese, Spanish, Portuguese, Arabic, Hindi and English, and will include stories about how different food cultures have practices that can benefit the environment. Programmes will cover:

- Polish food
- Caribbean food
- Somali food
- North African food
- Spanish food
- Indian/South Asian food
- Portuguese/South American food
- Foraging/natural alternatives
- Food and eating for the elderly
- Food for children and school pupils
- Traditional food of each culture
- Healthy alternatives
- Sustainability
- Food waste
- Eating on a budget

### Dame Emily Park Project

This community garden project in a Bedminster park is developing a sustainable herb garden and community composting area. By making the garden a source of edible and sensory plants, the organisers hope this project will galvanise local people to get more involved in park activities and give a wider sense of ownership.

### Montpelier Bean Feast

In 2009 a group of local residents got together to resurrect an annual Montpelier event from the eighteenth century, the Montpelier Bean Feast. Bristol 2015 is supporting environmental activities and practices at the festival.

### 32 School and community garden projects funded via Neighbourhood Partnership

| **Go Green** is the brand new initiative to join up businesses and organisations in Bristol and the West of England that are working towards a sustainable future. Go Green is working very closely with Bristol 2015 and the Bristol Green Capital Partnership to drive, recognise and celebrate the positive actions that businesses can make in sustainability during Bristol’s year as European Green Capital in 2015. Go Green is a tool open to every business, charity and public sector organisation wanting to make a difference to their local environment, and if you are committed to the green agenda, you will be eligible to join free of charge. By signing up to Go Green, and then steering your business along an easy-to-follow pathway of: Say it Do it Prove it.

This will not only allow you to demonstrate your commitment towards making Bristol a Green Capital through access to the unique Go Green branding, but will also help you to show exactly how your business is going green; be that through using sustainably sourced teas or coffee, by hosting green workshops or by creating How To Guides from your experience that other businesses can use.

Specifically, as part of Go Green, we will be suggesting that businesses and organisations implement new measures and practices under five key Pillars: Planning & Resilience, Travel & Transport, Energy & Efficiency, Sustainable Sourcing, Happy & Healthy. Sign up for your free bespoke action plan at www.gogreenbusiness.co.uk.

In 2015, Go Green is holding regular events including 10 Business Breakfasts with expert speakers, practical advice and case studies; engaging 1000 businesses and supporting the creation of at least 250 Go Green action plans; working to recruit a number of food related businesses; developing ‘How To Guides’ and top tips about sustainable food sourcing, sustainable catering and reduction of food waste in collaboration with local organisations and projects such as Eat Drink Bristol Fashion, FareShare SW and Food Route. | Low Carbon South West and Business West
Contact Amy Nicholas info@gogreenbusiness.co.uk | Core funding from Bristol 2015 | Go Green will have created a strong, vibrant community of engaged businesses across the city who will be supporting one another through shared best practice, inspiration through case studies, workshops, behind the scenes tours and other events. Go Green encourages businesses to work together to become even more sustainable throughout 2015 and beyond. More businesses will be aware of and actively be supporting local organisations such as Fairshare, and this increased awareness and creation of demand will help both the local projects and also the businesses in their goal of being more sustainable. More businesses will be aware of initiatives like the Sustainable Restaurant Association, Food For Life Catering Mark, Sustainable Fish Cities, Bristol Pound, Fairtrade Business Awards, what to do with their food waste, how to reduce their food miles and how support the local economy through supporting from our online tool and meeting organisations through our events who can help them.

**How will you measure success?:**

Quantitative: Through the number of actions... | Yes | Yes | Yes | Yes | Yes |
plans created, number of people on mailing list, number of Twitter followers, number of Prove It member, number of businesses that attend events.

Qualitative: Testimonials and feedback from local organisations. Case studies on the connections that people have made as a result of Go Green promotion of their services at our events, through our online tool and website articles.

**RCC Bristol’s High Streets/Local Centres Action Plan, at draft stage April 2015:**

There are references/actions in the plan that will directly impact on the food sector – for instance promoting alternative delivery methods (freight consolidation; cycle deliveries); promoting procurement opportunities with the local supply chain in mind; promoting initiatives/campaigns such as Independents Day & Small Business Saturday

Chris Sunderland  
chris.sunderland@real economy.co.uk  
mobile 07929990153 | Sensit Capital Neighbourhood Partnership grant re work in Avonmouth.  
We aim to focus our activities particularly on areas of the city where there is high unemployment and little choice in food retail with the intention of: growing the capacity of the local food system, giving access to fresh healthy local food, developing community life, encouraging new enterprise.  
Measures of success include numbers of buying groups, numbers and socio-demographic analyses of participation, volume of purchases, stories around food and health, community and enterprise. | By giving a market to local producers we hope to give confidence to start ups and trade in the growing sector.  
We are looking to develop a distribution system as part of Real Economy, possibly in partnership with other local enterprises.  
We intend to provide dried as well as fresh foods, along with other kitchen products, so as to offer a range of provisions that is an alternative to supermarket shopping.  
Our system of food retail works with pre-ordering so there is no waste at the interface with the end customer. | | |
| Sustainable Food City actions, relevant to 2020 outcomes: | | | | |

**Real Economy Co-operative**

Real Economy Co-op was launched in September 2014 and has nine food buying groups in operation around the city, sourcing fresh foods from local producers. Real Economy will be working with Avonmouth Community Centre to improve access to good food – in an area where there is only one small shop (the Co-op) selling fresh foods.

Real Economy have commissioned a research piece, monitoring the progress of Real Economy over 3 years in order to assess the feasibility of a national project. This has been funded by Joseph Rowntree Charitable Trust. We are doing some baseline statistics now.

Simple number of buying groups is probably not helpful on its own. There will be annual progress reports and a final report after three years, if we do any general research on areas of the city etc and food, we will be happy to share them with others.

### Project outline

#### Sustainable Food City actions, relevant to 2020 outcomes:

- **BCC Easton & Lawrence Hill, Hartcliffe City centre closures:**
  - Once a month, May–September 2015
  - Suppliers BCC consumers in the city centre, raising the profile of local suppliers.

- **Temple Quay, impermanent and built in yurt tents.**

  - Our mission statement is to local supply in residence.

#### Annual event:

- **EDBF brings a pop-up restaurant to Queen Square, in the centre of Bristol,** which attracts around 30,000 customers each year. As part of this we have a fine dining restaurant and an informal tapas bar. We promote the use of local supply in restaurant operations throughout the event. We also have a café at Temple Quay, in-pavement and built in yurt tents. Our mission statement is to serve high quality, sustainably sourced food in interesting spaces.

  - EDBF connects producers & chefs working in the Bristol hinterland, with consumers in the city centre, raising the profile of local suppliers.

- **BCC Annual "Meet the Buyer" events matching purchasers with smaller, local suppliers**

- **Make Sunday Special**

  - City centre road closures with a “re-imagining” of the road space – music, entertainment, market stalls, kids’ activities, encouraging cycling & walking etc.

  - City centre closures: once a month, May–September New for 2015: Make Sunday Special “local” events in Avonmouth, Bedminster, Easton & Lawrence Hill, Hartcliffe

- **Wholesales Road Market** moving to weekly from May 2015 (previously Intu Fortnightly). Farmers’-type market has been in operation since 2006.

- **BCC planning to produce up-to-date guidance on establishing a market. Target date: end of 2016**
start by the sustainable restaurant association
39 schools and 106 businesses have made fairtrade pledges
## 7. CATERING & PROCUREMENT

### Aim – Transform catering & procurement

**Project outline**

Please give a brief description of your project/business plan including how long it will run for. If projects are unrelated, please enter them separately.

**Fairtrade Producer visits**

- **Annual event in Fairtrade Fortnight, in partnership with Bristol Link with Nicaragua.**
  - A Fairtrade farmer visits Bristol schools and community events to talk about the impacts of Fairtrade on her and her community. The desired impacts are for more schools, community groups and businesses to procure more Fairtrade.
  - Bristol Fairtrade Network
  - Jenny Foster
  - bristolfairtradenetwork@gmail.com
  - Self-funding plus small amount of sponsorship
  - Increased awareness of how vital it is to procure Fairtrade in schools and organisations.
  - Increase in Fairtrade procurement.
  - Measured by feedback from schools, number of people impacted by the Producer, questionnaires to teachers.
  - Yes - Contributions
  - Yes

**Field to Fork Foundation CIC**

- has recently been formed to engage with the Bristol and South West catering industry on the subject of operating sustainably.
  - We will be hosting a series of events relating to various aspects of what constitutes a sustainable menu.
  - Our vision is to ‘make Bristol the capital of sustainable catering by 2020’.
  - For 2015: Sustainable Food Summit, where 150 delegates from the catering industry will explore how best to ‘build sustainable menus’. Information will be captured and developed into ‘how to’ guides.
  - Field to Fork Foundation
  - Amelia Twine
  - http://eatdrinkbristol.solutions.co.uk/field-to-fork
  - No current funding, CIC recently formed. We aim to achieve a minimum of £5k in year one of our operations
  - Bristol will lead the way in making changes within the catering industry in favour of operating more sustainably. We will gather data in 2015 as to how many restaurants, and caterers are signed up to schemes such as SRA and the FFL Catering Mark and will chart any increases, we will also measure improvement through our events and our continued relationship with companies who continue to attend and provide information on how they are changing.

  - Yes

**Soil Association: Food For Life Catering Mark**

- **As of 28 May 2015:**
  - 12 businesses in Bristol who hold the Catering Mark, serving just over 30,000 meals each day
  - 18 schools with a Food for Life Partnership award
  - In order to meet our targets for the Food for Life Catering Mark this year it is our intention to increase the number of Food for Life Catering Mark meals served in Bristol and across the UK. As part of this work and in conjunction with Soil Association policy work we will be targeting specific sectors within Bristol and the further South West region building on the groundwork we have done over the last year with events and campaigns aimed to highlight the benefits of Food for Life Catering Mark certification.

**Bristol City Council: Catering Contracts**

- Improvement in BCC food and catering procurement standards to ensure not

<table>
<thead>
<tr>
<th>Procurement, Bristol City Council</th>
<th>Y</th>
<th>Y</th>
<th>Y</th>
</tr>
</thead>
</table>
only compliance with the revised Government Buying Standards, but also use of the new ‘balanced scorecard’ tool to bring about excellence in this area. Aspiration to increase the amount of local and seasonal fruit & veg going and see allotment surplus.

Bristol City Council are reviewing all their food and catering contracts, with the aim of raising standards to ensure good compliance with the Government’s Plan for Healthy Sustainable Procurement of Food and Catering (2014). The Soil Association’s Catering Mark Standards are being used as a measure of compliance with this, with caterers being asked to accredit themselves with relevant Assurance schemes.

BCC inhouse catering includes: Ashton Court Mansion café and golf course, Blaise Castle café, Oldbury Court and Café Create. BCC procured catering contracts include the Mayor’s Mansion House & hospitality/events catering, Museums & M Shed catering, Community Meals contract (meals on wheels and 2 community link cafés) and Bristol Schools. Other catering to be reviewed includes Leisure Centres and Libraries.

**UPDATED FEBRUARY 2016**

**Bristol City Council: Social values policy, expected to be adopted in 2016.**
The new social values policy is looking at how BCC can favour local & seasonal produce.
Bristol Pound are working with BCC on ways the Social Value act can promote £B as a tool for localising procurement with the benefits that brings (how much of BCC£400m can be recirculated as £B?)

**UPDATED DECEMBER 2015**

**West of England sustainable procurement working group**
Cross working regional group on public procurement
1. Establish a shared database of local suppliers, able to fulfil Council contracts - jointly with UWE placement
2. To explore feasibility of establishing a Food for Life equivalent standard for smaller suppliers - to provide a low-cost option for them, and a recognised standard for Councils. To be developed in conjunction with the Soil Association and possibly with the F3 business tool, or with Go Green.

**UPDATED DECEMBER 2015**

**SPP Regions Project**
Use food & catering procurement to pilot a study that considers the whole-life energy use (transport, food production, energy consumption etc)

**UPDATED DECEMBER 2015**

| Indicators from Baseline report, mapped to 2020 outcomes | 11 businesses hold the food for life catering mark | 4 schools have received food for life partnership awards | About 23,620 food for life catering meals are served each day in Bristol |

### Sustainable Food City actions, relevant to 2020 outcomes: [3.6]

#### Blue Finger Alliance

The Green Belt and Local Food campaign will be launched this summer (June 2015) at the Bristol Festival of Nature. It aims to promote the Green Belt as a valuable source of good local food, something that is providing direct benefit to the city and is worth protecting. We will produce a leaflet and some promotional material around this campaign.

**Protection of land** is something that is going on all the time at CPRE. Our volunteers monitor and respond to numerous planning applications which might unjustifiably threaten the countryside and green space in both the city and countryside. This activity falls within the framework of the local or sub-regional plan, and we will often challenge applications for development that do not comply with that plan, and are not supported by the local community.

The Food Web methodology is a technique developed by CPRE nationally and available to anyone looking the map their local food webs in their area. It can help identify vulnerabilities in the food system as well as strengths, and can be a good way to prove that certain infrastructure should be retained or improved, or to resist the introduction of supermarket which might bypass all these important local food webs. We are not working on this locally at the moment, but it is available as a tool for identifying and protecting local food links.

Also delivers against aim 3.

### CPRE Avonside

<tbody>
<tr>
<td>Bristol City Council Allotments Team</td>
<td>The current Allotments Strategy runs up to 2019. It sets a minimum provision of 7 plots per 1,000 residents, with all residential areas to have access to an allotment site within 0.75 mile. The team are actively seeking potential new sites in areas where there is a demand/lack of provision. The Council acquired a new 25-plot site in St John’s Lane, Bedminster in Autumn 2014. The first tenants are growing on the site in 2015. Work is currently underway (April 2014) on a new 16-plot site at Tormarton Crescent, Henbury (this is a reclaimed allotment site – one not used for growing within living memory). The Allotments Team will also continue to work on security issues (growers are deterred by the prospect of working on insecure sites), and access issues (constructing raised beds for disabled growers etc).</td>

Bristol City Council: Joint Strategic Planning Strategy
Consider food and agriculture part of the considerations of the landscape, habitat and environment work stream, and part of the Sustainability Appraisal of proposals of the Joint Strategic Planning Strategy 2016–2036. To inform planning decisions and longer term strategic planning processes.

Sarah O’Driscoll
Strategic Planning Service Manager
Bristol City Council
info@bristol.gov.uk

Get Bristol Buzzing initiative
The aims of this initiative are to link all activities related to pollinator conservation in Bristol and promote better habitat management for insect pollinators.
A Greater Bristol Pollinator Strategy will promote shared aims and actions among Strategy partners. The process for partners to sign up to the Strategy is being finalised and will be available later in May via a new website being designed for the Avon Wildlife Trust project My Wild City and incorporate information on Get Bristol Buzzing and the local Pollinator Strategy. The strategy can be downloaded from www.getbristolbuzzing.org.
The strategy aims are: 1. Protect existing habitat and increase the amount of pollinator habitat across the Greater Bristol urban area. 2. Raise awareness of the importance of insect pollinators among the public, business and private landowners. There are seven Strategy actions for 2015 and proposed Strategy actions for 2016–2020. The Strategy will be achieved via an annual Implementation Plan. The 2015 Implementation Plan is currently under development. The strategy, annual Strategy Actions and Implementation Plan will be reviewed annually. Habitat management for pollinators includes management of natural and managed green spaces and favourable management of food growing areas to benefit pollinators.

Katherine Ballock,
University of Bristol,
urban-pollinators@bristol.ac.uk
www.getbristolbuzzing.org

Initial funding for Strategy development from Defra (Dec 2014-Mar 2015)
Increased area of habitat managed favourably for pollinating insects. We are planning to map current and future land under favourable management for insect pollinators and increase the area managed for pollinators between 2015 and 2020. Target to be decided once the baseline data has been recorded.

BeeBristol are developing planting schemes, workshops and raising awareness of pollinator decline to make Bristol more pollinator friendly. We are creating new habitat for bees including pollen and nectar rich wildflower, shrubs and trees in different community gardens, green roofs and corridors across the city. Using local volunteers we hope to enable these taking part to enjoy the beauty of gardening, working together and the rich experience gained from outreach work. The project is aimed at building on the growing support for pollinators and complementing current schemes. BeeBristol will also highlight dangers to pollinators including the use of chemicals, misuse, bad management or discretion of habitat and disease / health issues. We are also creating art pieces and installations to do this like the ‘honeycomb meadow’. By selling products, providing services and through donations, we hope the project can support itself and grow to become a prominent organisation. BeeBristol is being established as a registered charity in order to protect assets, claim gift aid and recognise the importance and benefit of not-for-profit community work, we hope to grow and support other initiatives in Bristol in line with our constitution.

Tim Barley, BeeBristol
info@beebristol.org
www.beebristol.org

Bristol Regional Environmental Centre (BRERC)
Supporting the Pollinators initiatives. Encouraging the recording of pollinators. (Ongoing)
Providing training workshop on recording and identifying bees and associated species. (September & December 2015)
Collating species and habitat data, managing that data and making it available to others. (Ongoing)
Provide training on habitat surveying. (September 2015)
Provide advice on data management to others including community groups, Natural England. (Ongoing)

Tim Garner
www.brerc.org.uk/
Funded by local authorities

Indicators from Baseline report, mapped to 2020 outcomes
There are 866,926 hectares of farmland in the West of England and of this area 822,663ha is used for food production

Bristol city council owns 6,160 allotment plots – roughly 3,976ha. There are 45 active community growing projects which cultivate 296,570m²
9. URBAN AGRICULTURE

Aim – To increase the amount of Bristol-grown fruit & vegetables supplied to restaurants, cafes, markets & households across the city

Project outline

<td>Matthew Tree Project: E: <a href="mailto:markgoodway@the-matthew-tree-project.org">markgoodway@the-matthew-tree-project.org</a>&gt;</td>
<td>Green Capital Neighbourhood Partnership grant £4,500 towards FOODTURES work at the Rock in Bristol</td>
<td>Local producers are relying on charity and/or benefits</td>
<td>Fewer areas of Bristol do not have access to healthy, nutritious food.</td>
<td>More people are working in the local food sector and able to provide for themselves and their families above the living wage threshold.</td>
<td>Significantly more 'good' food is being produced locally and sold locally at cafes that are fair for the producers and affordable for the consumer.</td>
<td>People are more connected with food production and with each other resulting in greater community cohesion and better health and well-being for all, especially the most disadvantaged.</td>
<td>Food products are being sold into local businesses, retailers, restaurants and households which will have increased significantly through our project and others like it. Success can be measured by tracking the amount of such produce being sold into local businesses and</td>
<td>By producing more food locally and selling it locally the wealth of the city is increased, i.e. value in terms of food is produced on city land rather than shipped in from elsewhere and the sold locally meaning more money is being retained within the city. This increases the wealth of the city in two ways (a) a growing produce on local land and processing value added products in local kitchens, and (b) by selling the products (produced locally meaning 100%) of the return is retained locally.</td>
</tr>
</tbody>
</table>

FOODTURES, The Matthew Tree Project (various sites)

The Matthew Tree Project is setting up market garden food growing at the Rock, Bridgwater and two other sites within Bristol and has plans to build a fully equipped education and skills training centre at one of the sites. An accredited 3 year course called ‘The Local Food Sector Qualifications’ is being developed in partnership with education providers and will cover (a) food growing and environmental conservation, (b) food processing, (c) food logistics and distribution, and (d) food retailing. The education centre will also offer short courses in food related activities, i.e. growing food in your garden to local residents and citizens of Bristol. Schools will be invited to visit the market gardens and learn about local food production, sustainability principles and nutrition. The funding will also contribute towards paid apprenticeships for long term unemployed people in the community to gain skills, qualifications and employment.

The FOODTURES project will create a high number training places that will lead to sustainable and rewarding food sector related jobs for local people including TMITF Food PLUS clients and the long term unemployed. It will grow high quality fruit & veg for local sale and for processing into added-value own-label products at the FOODTURES Processing Kitchens throughout Bristol.

FOODTURES are currently seeking land for commercial growing, across Bristol and the surrounding authority areas.

Growing project supported by food distribution hub at Inns Court with walk in fridge and freezer and two vehicles, and by emerging market/retail offer at Inns Court (see Aim 1).

Also delivers against Aim 2 – educational engagement with children & public.

Also delivers against Aim 5 – infrastructure/distribution.

Also delivers against Aim 10 – the Processing Kitchen can deal with surpluses generated elsewhere, via e.g. harvests collected by the Growing Network, or unsold produce collected from St Philip’s Wholesale Fruit & Veg Market and others.

See also Food Plus Centres and Good FoodMarket under Aim 1.

Stima Hill is a young Community Supported Agriculture project that integrates economic, ecological and social interests in a local enterprise whose core business is growing vegetables year round for its members. It is developing its smallholding and expanding its production and membership over a six year period, on a site in Bristol’s former market garden area. Sharing in the harvest and social, ecological and education benefits of the project appeals to a diverse range of people living in local neighbourhoods. The project has now reached a stage of development where a step change from a voluntary to a professional approach is required. We need to grow in terms of our market in order to provide for a fully functioning core team of paid staff. In addition we intend to work in partnership with Food Bristol to increase our community engagement and help secure the future of the Food Bristol site. We aim to use the Green Capital year to achieve this transition.

Stima Hill Shared Harvest, E: stimahillsharedharvest@gmail.com, W: www.stimahill.co.uk

The amount of urban food production that is being supplied into local businesses, retailers, restaurants and households will have increased significantly through our project and others like it. Success can be measured by tracking the amount of such produce being sold into local businesses and
At April 2015, Sims Hill has 60 full veg share members. Their aim is to have 90 full share equivalents by the end of the year.

Sims Hill hopes to attain full Permaculture Land Status in 2015. Also helps deliver against aims 2 and 4.

<table>
<thead>
<tr>
<th><strong>IMPROVING ACCESS TO MARKETS</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>Many hundred households will each work by eating locally grown, organic vegetables, either receiving a box delivered to them, or purchased from local markets or selected retailers. This will be a value driven choice, preferring to consume food from a local field provided by a social enterprise.</td>
</tr>
</tbody>
</table>

**The Community Farm**: We are a community supported agriculture project established in 2011 with over 500 members. We grow organic vegetables and fruit on land in the Chew Valley and supply households, retailers and restaurants throughout the Bristol and Bath city region, having established a co-operative network of local growers.

We provide opportunities for people to reconnect with where their food comes from, with regular volunteering days and education programmes. We work with partners such as Bristol Drugs Project to train people so they may return to the workforce and host schools and businesses.

We also work closely with other local social enterprises, such as Real Economy Co-operative and Bristol Pound.

Also helps deliver against Aims 4, 5 and 6.

**Bristol Food Producers**

Bristol Food Producers is a network of food producing enterprises, in Bristol and beyond: a light weight, cooperative, producer-led umbrella organisation that can represent mutual interests, address shared obstacles and seize new opportunities for producers in Bristol’s food shed as a united group.

The aim of this project is to scale up local food production in and around the city (growing, processing and distribution) by connecting up existing projects and helping them to collaborate. It will create an innovation and support hub that enables and promotes collaboration and peer support and resource sharing between existing and future urban, peri-urban and rural community-connected food enterprises.

Our strands of work include the following (more detail can be found at www.bristolfoodproducers.org.uk)

**CONTRIBUTION TO OTHER CATEGORIES**

**MARKED IN RED**

**INCREASING PRODUCTIVE LAND**

- **Land matching**
  - Creation of a map that can land under or available for food production and overlay this with nature and wildlife maps.

- **Land matching and land matching and business support**
  - Facilitated process and match-making event to help growers to access land and landowners to better understand land partnerships.
  - THIS ALSO CONTRIBUTES TO R. LAND & PLANNING (to promote the use of good quality land & in around Bristol for food production in balance with the natural environment)

- **Early stage business development support**
  - Promotion of existing support and new tailored support programmes for growing enterprises.

**IMPROVING FAIRNESS AND EFFICIENCIES FOR SMALLER FOOD PRODUCERS**

- **Member Benefits**
  - A more cohesive identity and strength in numbers; group buying discounts, learning opportunities (e.g. study visits), member discounts on events, strategic representation of needs/interests, networking events; news and funding.
  - THIS ALSO CONTRIBUTES TO E. ECONOMY II (to promote community-led food trade such as co-operatives, buying groups, Community Supported Agriculture & pop-up shops)

- **Tools for the Job Register and Resources**
  - Online mechanism for sales and offers; sourcing facilities, bulk or joint purchase, machinery, tools, labour, joint working. Open directory of resources.

**IMPROVING ACCESS TO MARKETS**

- **Quality Assurance and Branding**
  - Report on the needs of small producers in relation to meeting

</tr>
<tr>
<td>Ultimately we hope to increase the volume and accessibility of good, local food in Bristol (in line with the Bristol Good Food Charters definition of good food). This will involve helping existing growers and processors to strengthen and expand their businesses and customer bases, as well as smoothing the way for future growers to become established on new pieces of land with the skills they need to succeed in growing for their communities. We are also interested in supporting producers and farmers within a 50 mile radius of Bristol to supply more food directly to Bristol and to support food processors to use more locally grown products.</td>
</tr>
</tbody>

**YES** (Our webpages on the Bristol Food Network site will contain resources for those wanting to make a livelihood from food production and we will also have member only areas for sharing asks/answers) YES (Through our enterprise and land matching strands we hope to catalyse more enterprises as well as strength and expand existing ones) YES (We hope to encourage new entrants and new enterprise to developing and help existing projects to attract more interns/volunteers/apprentices through offering the Bristol Certificate) SOMEWHAT (Not our top priority but will be encouraged through Upscaling Community Growing course, Eat Bristol Brand and other inclusion and marketing work with partners) YES (We hope to increase the amount of land grown on and encourage new primary and secondary production enterprises to establish, we also hope to make it easier for growers and farmers near to the city to find local markets through the Eat Bristol brand and our research into Routes to Market)
In advance of developing our new site we are currently engaging with a wide range of people and groups through our ‘Mini Grow Box’ demonstration

**Bristol Fish Project**

After a successful pilot in a former college site in Redcliffe, urban fish farm The Bristol Fish Project is now working towards producing fish and vegetables commercially. Their aquaponics system of farming uses the nutrients in fish waste to grow plants hydroponically. Bristol Fish Project is a community-supported aquaponics farm in Bristol. Our work is an experiment in the commercial viability of community-supported aquaponics. We want to see if urban aquaponic farming can be a viable livelihood, to explore how aquaponic farming can help to close urban material loops, and to build community through innovative, collaborative local food systems. As well as employing and upskilling local people, we also teach the skills for running an aquaponic business to new entrant farmers; encouraging the wider uptake of the farming method. Aquaponics is a fairly recent addition to the methods and techniques available to food producers and due to its newness, much of the data for small businesses to get involved is still missing. We hope to contribute our experiences and data to the growing body of information available to small businesses.

Bristol Fish Project

info@bri.stolfish.org

30,000 green capital strategic grant.

Bristol will have its own urban fish farm supplying fish for direct sales, to caterers and select fishmongers. Students of the fish project will go on to set up their own farms – like has happened with Grow Bristol. We can measure the number of fish sold into the local market, the weight of plants sold locally, the volunteer hours contributed, the amount of jobs created and we can map our supply chain up and down stream to see how we are doing.

Grow Bristol is a new urban farming enterprise developing and demonstrating innovative and sustainable ways of growing food in the city spaces of Bristol for the benefit of all its inhabitants and the wider world. Our aim is to produce fresh, local and sustainable food all year round; educate and engage with people to increase knowledge and wellbeing; promote enterprise and employment opportunities and work with others towards a sustainable local food economy. We call this approach ‘smart urban farming’, bringing together innovation and enterprise to deliver multiple environmental, economic and social benefits.

In 2014 we completed a pilot project developing growing systems based on ‘controlled environment agriculture’, vertical farming and aquaponics. We are now ready to scale up our activities by realising our plans to transform a disused industrial site into a productive urban farm and space for training and public engagement. The site is close to Temple Meads station and we have planning permission and a lease agreement to operate on the site until 2017. The focus of the site will be our ‘Grow Box’, a recycled shipping container repurposed as an optimised food production system growing fresh produce (salad leaves, herbs and fish) for the local market all year round. On this site we can both develop our small-scale horticulture business and deliver engagement, training and volunteer opportunities with different groups and individuals around growing food and a business.

In advance of developing our new site we are currently engaging with a wide range of people and groups through our ‘Mini Grow Box’ demonstration

Subsidised home compost bins are available from the City Council.

Home composting is an inexpensive and natural process that transforms waste, tea bags and coffee grounds is to compost. For those with gardens, the best thing to do with vegetable peelings, fruit waste, tea bags and coffee grounds is to home composting.

There are however some food wastes which are not easily dealt with by home composting as they can attract vermin if added to the compost heap. These include cooked plate scrapings, bones and processed foods, like bread and biscuits. There will also be residents who are not able to home compost and in order to ensure that remaining food waste is processed and turned into a product suitable for use as a soil improver Bristol City Council provides residents with a separate food waste collection. Each household is provided with a food waste caddy which is collected weekly from households.

The Bristol Food Waste Policy – as set out in BCC’s 2009 Waste Strategy is: “Our City: Ambitious Together – Our Green City, ensuring our city develops in a sustainable way, tackling climate change by reducing food miles, maximising recycling and reducing waste”. Collected food waste is processed using Anaerobic Digestion technology to produce energy from biogas and a ‘digestate’ which is used for land remediation projects. Wessex Water (Genrec) are contractors delivering this service for BCC. The Food Waste Contract ends in 2028 so little could be achieved until then in terms of food waste collection and treatment changes. Currently Bristol City Council have no plans to offer businesses a food waste collection service. Businesses are responsible for organizing their own waste collection.

Feed me and win: West of England campaign 29 June 2015–18 March 2016 Rewarding residents using their weekly food recycling collections. This campaign seeks to increase participation in food recycling, reduce levels of food waste currently collected in the residual waste stream, and through the use of the ‘Love Food Hate Waste’ campaign promote consistent regional recycling.
Elm Tree Farm

We have just been given funding to develop the kitchen in the farmhouse at Elm Tree Farm. Once it is up and running, we will be able to use our surplus produce to make preserves, chutneys, fermented and dehydrated foods which we will then sell or supply to local restaurants, cafes etc. We also hope to use seasonal ‘gluts’ of produce from other food producers that would otherwise go to waste. The kitchen will also provide training to the adults with learning difficulties that we support. In time we hope to run workshops in preservation and fermentation techniques.
See also shop under Aim 1.

What Happens Next

The What Happens Next Project is striving to put food, growing spaces and outdoor learning higher up the agenda in children’s education. By engaging children with food and natural life cycles, we can move towards a society that considers the impacts of its actions. Our services include educational food programmes, design and installation of edible gardens and resources to help people interact with the environment in a conscious and sustainable manner.

One of the resources we are providing is an easy-care wormery that turns food waste into plant food. For us, wormeries are an integral part of educating young people about life-cycles and fostering a mindset that asks ‘what happens next?’

We have introduced wormeries to 3 primary schools in Bristol as part of our Seed to Celebration giveaway in May, where we gave seeds and growing and cooking resources to all 106 primary school in Bristol. The next phase of our strategy is to introduce these low-cost wormeries to many more schools in Bristol. The wormeries will give the school the capacity to turn high volumes of food waste into fertiliser that can be used in growing projects and eventually for micro-enterprises.

See also Aim 2.

What Happens Next Project
info@whathappensnextproject.co.uk
www.whathappensnextproject.co.uk
Commercial enterprise
With regards to food waste, we hope to have introduced wormeries in 30% of Bristol’s primary schools by September 2017. This will allow these schools to covert up to 150 litres of food waste into valuable compost in just two weeks (almost 50 weeks quicker than regular composting methods).

By 2020 we aim to have introduced wormeries to 50% of Bristol’s primary schools, as well as at least one secondary school.

We also aim to be supporting at least one Bristol school with selling excess nutrient-rich compost to nurseries and professional agriculture projects.

This would create revenue for the school, discounted fertiliser for the producers and full circle use of waste.

Resource Futures

Resource Futures is an independent British-based environmental consultancy, which collects data and develops resources to guide customers in efficient use of material resources and change behaviour to more sustainable practices.

Understanding what food is wasted

Resource Futures undertake analysis of waste arisings to understand how much food waste is being recycled and how much is still going into the rubbish bins. The research we helped to deliver in 2012/13 found that 7.0 million tonnes of food and drink waste was thrown away from our homes in 2012. That’s enough to fill Wembley Stadium nine times over! This equates to around 50kg of food each week per average UK household. 60% of this could be easily avoided. The research shows that the average UK household is throwing out around £470 of food each year.

In Bristol a study undertaken in 2013 showed that nearly 15,000 tonnes of food waste was being put into the rubbish bin rather than the kitchen caddies provided to householders.

A study of waste composition across the West of England authorities is being conducted in 2015.

During 2015 Resource Futures is also undertaking a national study to understand where food is being wasted throughout the food supply chain.

Promoting food waste reduction and recycling to householders

Resource Futures works with Kix (the company providing waste services to householders) to provide support and advice to householders about their...
waste and recycling services. This service is available to households who request information through the Council’s helpline.

In association with WRAP, Resource Futures has developed a resource named “Love Food. Hate Waste. Save More.” For people/groups on low income and hard-to-reach groups and vulnerable adults helping them to reduce food waste whilst saving money.

**Promoting food waste reduction to food supply chain**

Resource Futures are also developing with WRAP a similar resource for the business sector (manufacturers, caterers, retailers, but not including growers) developing a suite of materials on how to reduce food waste in the supply chain. This resource will be ready by the end of 2015.

| **Food Route** is a project in development. Being led by FareShare South West in collaboration with Neighbourly and Incredible Edible. It is a digital platform for linking surplus food from communities and businesses with those who are able to use or redistribute it, therefore reducing the amount of edible waste food going to landfill. Surplus will come in all scales, from allotments up to major supermarkets. Food will be dealt with on a hierarchy of: human consumption first, then animal consumption, then Ali. Food Route will be launched by the end of 2015. | FareShare South West, Neighbourly & Incredible Edible Bristol. http://faresharesouthwest.org.uk/ www.neighbourly.co.uk/ http://ediblebristol.org.uk/[
| FareShare South West – Eighth Plate are developing a toolkit to be used at festivals to measure how much edible food is wasted and training vendors on how this waste can be delivered to vulnerable people nearby. The project will be working with 5 trial festivals during 2015. This is going beyond this to create a new “green” standard for festivals. For an example of the scale of the problem, it’s estimated that 50–70 tonnes of edible food is wasted at Glastonbury Festival each year. | www.eighthplate.org.uk Funding from Exmoor Farmers and WRAP Up to 60 tonnes of food saved from waste. Change of behaviour within traders, organisers and festival attendees | Data is Rubbish Neacie Reid www.thisisrubbish.org.uk Increased transparency and awareness of food waste in one supermarket chain. Yes |
| FareShare South West – Surplus Supper Club is the catering arm of FSSW. The aim of this project is to deliver an incredible catering service to corporate, community and individuals and in the process change behaviour within our customers and our volunteers. | www.surplussupperclub.org.uk | Food Cycle http://foodcycle.org.uk/location/bristol/ Volunteers gained an improved awareness of surplus food, and cooking skills. Local community |

**Funding from Bristol Green Capital strategic grant**

- Increased collaboration between food waste initiatives in the city as well as wider re-use organisations.
- An estimated 100–150 food companies engaged with the project and 100–150 organisation receiving the food engaged with the project. The amount of edible food going to landfill or anaerobic digestion will be reduced.
- Distributing around 480 tonnes of food per annum that would otherwise be wasted.
- Engaging and encouraging behaviour change with 150 organisations within the voluntary sector or Bristol and around 100 people who would normally not be involved with food waste.
- Change in behaviour in corporate, communities and individuals. Momentan developed to change purchasing habits and challenge procurement.
- Increased transparency and awareness of food waste in one supermarket chain.
- Yes
FoodCycle Bristol collects surplus food from Sainsbury’s and local independent food retailers and turns it into a three-course meal at a local community centre. These events are open to all but target people who are at risk of social isolation and food poverty.

FoodCycle Bristol also go into primary schools and run classes and assemblies on how to reduce food waste and cookery skills. As well as facilitating schools to put on their own FoodCycle Meals. This year FoodCycle Bristol are moving to a larger venue where they can have increase their community meal capacity twofold to 100 guests, and will also be able to serve meals twice a week.

FoodCycle Bristol are also developing resources for schools; in the form of a toolkit to be rolled out to Bristol schools. The toolkit will include lesson plans, with information on food waste and food poverty. The toolkit will also include advice on how schools can put on their own FoodCycle Feast; with children writing to shops, collecting surplus food and cooking meals, soups or smoothies to be shared at a communal meal with parents and guardians. The toolkit will benefit from lessons learnt from a number of case studies. These resources will be produced by autumn 2015.

In addition, FoodCycle Bristol have an education tent with food waste games, educational materials and a pledge tree that they take to local community events.

Bristol Skipchen are working to:
- Change legislation around best-before dates by using innovative projects to raise awareness, and by lobbying for change.
- Reduce the amount of food waste by working with restaurants and shops who give food to the project, through support & conversation.
- Raise awareness to help reduce domestic food waste.

Bristol Skipchen run a café in Stokes Croft, which aims to raise awareness of the amount of edible food thrown away and campaigns for system change. Skipchen collects out-of-date food from food retailers around Bristol and produces meals and asks customers to “pay as you feel”. Since January they have collected over 14 tonnes of surplus food and serve 100–200 meals a day. This summer Skipchen will be more mobile, attending festivals, migrant camps etc. and hopes to return to a more permanent venue in Bristol in the autumn. They have a trial and error approach to finding solutions for domestic and commercial food waste. Potential and on-going projects including running workshops in community kitchens, doing a trial with a local supermarket on redistributing food waste, working in schools and changing the ‘best before date’ culture.

Bristol Skipchen are working on a trial with Waitrose in Henleaze, aiming to collect 10% “waste” from the supermarket 7 days a week.

Bristol Skipchen are running a Disco Soup event in the Crofters in Stokes Croft, 29 May, with a 200 capacity. (See also aim 1)

The Sustainable Restaurant Association have a number of very active members in Bristol who want to improve their business’ handling of food waste. The SRA have just completed the FoodSave project in London (www.foodsave.org) using smart meters to run “food waste audits” for small to medium size businesses in the hospitality and food service sector (including restaurants, pubs and cafes). Through doing waste audits the 90% of businesses the SRA worked with have saved on average £5000-6000 and reduced food waste weight by an estimated 1.7 tonnes annually. The project methodology is proven to work and also provides best practice examples which can be used to raise awareness about food waste inspire other businesses to take action. The SRA are looking for funding/a way of financing a similar FoodSave-type project in Bristol.

Bristol Skipchen, a partner of the Real Junk Food Project, bristolskipchen@gmail.com

Skipchen is a partner of the Real Junk Food Project. Bristol Skipchen are moving to a larger venue where they can have an increased awareness of surplus food, access to a healthy meal, and get to utilise surplus food by taking home surplus to cook with. More schools will be educating children about issues around food waste. Children in participating schools will have improved awareness of the food system, food waste, connecting with food and improved cooking skills.

More surplus food will be re-distributed, better understanding amongst the public in retail sector on how to use and reduce surplus food.

**Technology success story.**
- It provides Bristol with a cost effective robust and reliable local solution for recycling food waste.
- It makes the cost of recycling food waste in Bristol affordable to many businesses and organisations.
- It reduces or eliminates the reliance on landfill for many food waste streams.
- It reduces food waste miles and reduces the carbon footprint of recycling food waste.
- It reduces the risk of the spread of animal diseases through the improper treatment and recycling of food waste.
- It is a technological exemplar of closing the loop on the food circular economy and demonstrates how unavoidable food waste can be put to good use so nothing is wasted.
